Housing Stress in Yorke Peninsula LGA

Housing stress is usually defined as where households, and low income households in particular, face housing costs amounting to more than 30% of their income, while *extreme* housing stress is where housing costs are more than 50% of income.

Housing stress is a commonly used measure of hardship and is an important indicator or risk of homelessness.

Table 1: All Housing

Total No. of Dwellings	4981
No. in Housing Stress	440
% of Households in Housing Stress	8.8%

Minimum Wage (full time, national)	$622.20

House Type	Average Rent
1 Bdrm Flat	$140
2 Bdrm Flat	$ -
3 Bdrm House	$223
3 BR Share House	$74

SACOSS is recommending that the state government:

- Increase the stock of social housing to assist those who are disadvantaged in the private rental market;
- Establish a Housing Stress Emergency Payment Fund to provide temporary assistance to prevent homelessness;
- Establish a moratorium on collection of rent arrears for people in public housing on recommendation from financial counsellors where debt will never be paid; and
- Implement the agreed funding for consumer credit legal services.
